EUROMAIDAN BOOK

As some of you know, I started writing these mails on Saturday, Dec. 1st, 2013, the day after students were beaten up on Independence Square in Kyiv, the start of the Euromaidan Revolution now known as the “Revolution of Dignity,” and the day before the first massive demonstration on Independence Square.

To mark the 10th Anniversary of the start of the Euromaidan Revolution and the concurrent beginning of these emails, I am making available a never been published book that I wrote in 2016, incorporating many of the emails I wrote during that period, plus extensive additional material. I was also interested in learning about how the Euromaidan Revolution was managed, especially its leadership. From my research and extensive interviews, I concluded that the leadership of Euromaidan was not what either Western experts or the Russians expected, or the kind of leadership one might learn at business school. As a result, there was continual misunderstanding between the protestors, and those in the West and Russia whom they believed constituted the leadership.

Among other things the book contains:

- **Extensive interviews with those involved in various aspects of Euromaidan, including:**
 - **Those responsible for food service and distribution**
 - **The design and placing of the barricades that protected Independence Square from the Interior Ministry police,**

known as the “Berkut”

- The person who established the initial first-aid station on Independence Square, and who later was responsible for managing and operating first-aid stations and makeshift hospitals located throughout Central Kyiv
 - A leader of one of the volunteer battalions
 - A member of “AutoMaidan”
 - The leadership of organizations located outside of Kyiv that provided logistical support and money, to support the protests in Independence Square, without which Euromaidan might have turned out differently.
- Also included is an extensive collection of YouTube videos, that appear in footnotes. covering the protests and the fighting. Some of the videos are very hard to watch. Included are:
 - Video of a presentation in Washington, DC by Yulia Tymoshenko’s legal team, rebutting the claims made by Yanukovich’s legal team of graft that took place when Tymoshenko was Prime Minister of Ukraine. The video amounts to dueling American “white shoe” law firms.
 - Video of a lecture given by my wife, Larysa, on December 12, 2013, on Independence Square sponsored by the Open University of Ukraine
 - Videos of the tragic events on Institutska Street, that took place on February 20, 2014
 - Security camera footage from Yanukovich’s estate, Mezhihiryia taken on February 18, 2014, showing movers moving Yanukovich’s personal effects, 4 days before his actual departure.
 - My own observations and stories from being in Kyiv throughout Euromaidan.

I have decided to withhold the names of those private individuals whom I interviewed, some of whom are now fighting in the Army. Other than this the book, and emails contained therein, are as I first wrote them.

As an exclusive offer to email recipients, you can purchase an advance copy of the book for \$25.00, or in any other recognized currency. It's in the form of an Ebook. To purchase, please click on the link [HERE](#). After December 9, 2023, the price will be \$30.00. I have no immediate plans to publish the book, so this is an exclusive offer.

I am very excited to offer the book to all loyal recipients.

From Bohdan

Sometimes fakes rebound almost immediately. Yesterday the rashist propaganda networks took a run at discrediting Thanksgiving.

In rashian a turkey is called an Indiuk. With this as a basis, one of the commentators said that the annual presidential turkey pardon, pardoning the Indiuk, is a small measure of apology for massacring millions of "Indians".

Turkeys are not native to "Asia", so the rashist mind conflated native North American peoples with native North American birds.

After a few minutes of describing the horrors inflicted on North American Natives by Americans, one of the other guests on the panel quietly noted that Indiuk is a rashist word whereas in English the name of the fowl is Turkey.

Taken aback, a millisecond of silence, followed by continued invective about American massacres.

It would not surprise me if next year, assuming rashia still exists, that some rashian commentator connects the annual pardon with political issues confronting Turkey. After all, rashian's are the only people who know which came first, the Turkey or the egg.

Fortunately, Turkiye is the proper name for the country.

Two Compelling Accounts of the War

["20 Days in Mariupol"](#) - Last Tuesday a documentary entitled "20 Days in Mariupol" was released by PBS, as part of their series called

“Frontline.” It was filmed mostly in one hospital in Mariupol, who were taking in residents of Mariupol who were wounded in Russian shelling that was exclusively directed toward civilian targets. It was horrific; it takes a certain amount of intestinal fortitude to watch. The hospital staff told the film makers to “show everything,” because the world needed to know what happened in Mariupol. It is my fondest hope that those Members of the U.S. Congress who are opposing continued U.S. aid to Ukraine can watch “20 Days in Mariupol,” because they should be aware that their opposition to continued support to Ukraine only helps the murderers.

[Oleg Sentsov](#) – Sentsov is a Ukrainian film maker, originally from Crimea. He was arrested by Russian occupiers on May 11, 2014, and accused of “plotting terrorist acts.” He was released in 2019, as part of a prisoner swap. After the war started Sentsov joined the Army and he was wounded. He’s now back at the front.

This video was taken recently near Avdiivka, during a firefight with the Russians. For those who have never been in a firefight, including me, this shows all the violence. Some observations:

- The Ukrainian soldiers go about their business as if they’re in no danger, even though bullets are flying continually and a few soldiers are wounded during the video.
- There appeared to be a woman present, even though she remains unseen.
- Ukrainian soldiers have become extremely adept at treating battle wounds under very challenging circumstances. In 2014, during Donbas invasion, the biggest reason for Ukrainian deaths was loss of blood.
- Ukrainian soldiers are making very good use of Bradley Fighting Vehicles. They have proven to be far more effective than tanks.

News From the Battlefield

The latest from “[Reporting From Ukraine](#)” covers new developments on the Dnipro Crossings. If Ukrainian marines can expand their lodgment to a depth of 8km., as “Reporting From Ukraine” states as

their goal, and neutralize Russian thermobaric artillery and guided bombs, then it is likely that Ukraine will place pontoon bridges across the Dnipro, to move heavy equipment and the estimated 40,000 regular army troops now located in Kherson Oblast, on the Right Bank. To stop this event from taking place, Russia will almost certainly have to move troops away from Avdiivka and Robotyne.

According to the Ukrainian Defense Ministry, Russian casualties remain elevated. Yesterday there were 1,100 Russian dead or seriously wounded, compared to 1,130 the day before.
