

Covid 19 and the Global Predators – We Are the Prey
Peter and Ginger Breggins

The Breggins had a lifetime preparation to write this blockbuster expose

The Breggins are psychiatrists with more experience even than that of Anthony Fauci. Fauci has had a lifetime practicing corruption, the Breggins in exposing it. They come out ahead on paper, but it appears for the moment that in practice corruption is winning. This is a source of despair, but should be no surprise.

What corruption are we talking about? Corruption ultimately involves money, and the pharmaceutical companies have a lot of it. They are uniquely positioned to benefit from corruption. The safety and effectiveness of their products is hard to prove. It must be done via a very expensive statistical process. Proving the efficacy of pharmaceutical products, whether Prozac which the Breggins exposed in the 1990s, or Covid "vaccines", as is the subject at hand, is left to the deep-pocketed drug companies themselves. The government agencies supposed to provide oversight are funded by these companies.

It is axiomatic that money pushes in the direction that it wants. The Breggins previously exposed how money had corrupted the process by which Prozac and other psychoactive drugs such as Paxil were approved. This time, they demonstrate step-by-step how money influenced not only the approval of the drugs for coronavirus, but the development of these drugs, and even the development of the disease that the drugs were already in place to solve. It's an entire package – invent the disease, have the drug ready to go, have the regulators in your pocket, and then spring at all for a multibillion dollar reward. Phenomenal. Also read the RFK Jr. book cited below for the history of how they learned the game in the 1980s with AIDS.

The story involves almost all of America's top billionaires (the quirky exception is Larry Ellison), the regulators, successive administrations who have bent to the will of these predators (Trump who didn't, suffered their wrath), the media - advertising revenue comes from these companies, and the trusting, compliant public. And that's how the book ends, with a plea to this public to wake up.

If the Breggins and others are right, this may be one dream from which the public cannot wake up. Bluntly put, these supposed vaccines may kill us. It may be part of a long-standing agenda to do exactly that. To thin the human herd. The latter half of this book is no longer talking about drugs so much as talking about what America needs to do to rescue itself.

The Breggins are uniquely positioned to talk about the personality of the psychopath. As psychiatrists they have dealt with lots psychopaths in the course of their practice. They state up front that those with which they dealt were criminal psychopaths who use the behaviors affected other individuals. But they draw a convincing parallel between individual and mass psychopaths.

People in power often make decisions deadly to thousands of others whom they don't know. Look at the decisions that presidents made, such as the decision that sent the Lusitania to be sunk initiating World War I, Roosevelt pushing the United States into World War II because at Pearl Harbor "At dawn they slept," the faked Gulf of Tonkin event that brought me to Vietnam, and George Bush's trumped up Iraq war. This is what leaders do, fully knowing that people will die. The ability of leaders to quite casually allow others to die is well-established.

These wartime decisions were ostensibly done for the good of the country, but always as well with some eye to their personal interests. Perhaps what we see today is merely a shift. The decision-makers have a contempt for the ordinary citizen – probably no different from the contempt for voters expressed by Winston Churchill and HL Mencken a century ago. In any case, their consciences don't appear to bother them as they force vaccines that may cause a mass die-off.

Bill Gates is arrogant – a word that the Breggins use frequently –in assuming for himself the role of the Savior of the human race by killing off a large portion of it. We shiver at the thought that he would take it on himself to make decisions with regard to our lives. Can we question whether such a conspicuously undevout person should take upon himself such a godlike role?

The even starker example is Gates' project to geoengineer the atmosphere, dimming the sun to supposedly stop global warming. The Breggins and many scientists consider global warming itself to be simply a ruse, a stalking horse for implementing programs that will thin the ranks of humanity. What else could be Gates' objective? Kicking off another ice age? Assuming that his 190 IQ is adequate to inform him that global warming is no more than a charade, it makes one shiver.

The media, captive as they are, and bereft of 190 IQs, are resolute in their desire to lump all who disagree together. Climate deniers, anti-vaxxers, racists, sexists, Christians and all of the deplorables lumped together, to be excluded from polite society. The grouping of these seemingly unrelated issues is not accidental. It makes sense if you assume that there is a global agenda afoot here. If you have to ask about it, as George Carlin would say, you're not part of the club. Per the Breggins' title, you are not a predator. You are the prey.

The Breggins' medical, pharmaceutical and legal analysis of the situation is flawless. Better than the other authors I name below, though I would add, not as complete as some of the video presentations named.

Their analysis of that what America ought to do is idealistic. For one thing they portray Donald Trump as a potential savior. Trump may be better than the alternatives, but he was and is unprepared. He had a want of experience in the government and by want of connections. In his presidency he brought in, perhaps had to bring in, people who had been corrupted by the system. Even if he were as smart as he likes to claim, he was unable to see through or get around the conflicts of interest of the people with whom he staffed his administration. Specifically, Trump was no match for Anthony Fauci and the bureaucrats who had been dug in for decades.

The other problem is that Donald Trump was seen as the figurehead and avatar of the dispossessed core of traditional Americans. As they do every president, they saw him through rose colored glasses, projecting unrealistic hopes on him. No President can fulfill his promises, or even avoid lying in order to get elected.

It is not an indictment of Trump, but of the American people. Even traditional Americans, want what we cannot have. We want personal freedom, the freedom to read what we want, express the thoughts that we want, and freedom from excessive taxation.

But we also want protection from the vagaries of life. We want Medicare and Social Security. We want disinterested public servants in the FDA, CDC, DOJ and so on to look after our interests rather than their own. We want honest stable money, although best way for politicians to get money is to create it out of thin air. We don't understand the contradictions inherent in all this.

The Breggins touch briefly on the most deep lying problem, which is that America used to be a country of people who, with belief in God and faith in themselves, had the courage to do things by themselves.

One of the issues that the book does not emphasize enough is fertility. If other analysts are right, not only will the injections be dangerous, which is to say likely to kill people in both the short and long-term, but likely to render the survivors infertile. This comes on top of a already severely depressed birth rate, especially among the traditional Americans who certainly make up the readership of this book.

Unless we believe in ourselves enough to have children there is no point in saving America. There will be nothing left to be saved. My point would be that the Breggins should stress the impact on fertility more, and emphasize the need not only to find ways as individuals to resist government but find ways to perpetuate our families and culture.

The Breggins do briefly write about belief in God. It must entail acceptance of the biblical notion that a belief in God is fulfilled by having and raising children to believe in Him. Dr. Breggins, an octogenarian, is not going to be around to see solutions. If there is to be one, it will be realized through his children's and grandchildren's generations. The book would be richer if it espoused such a long-term perspective.

All that said, this is a wonderful and necessary book. Of the many coming out on or around the subject, from Alex Berenson and Joseph Mercola for two, this seems to give the best coverage of the medical issues. Robert F. Kennedy's book provides a history of Anthony Fauci's long, corrupt association with big Pharma through the AIDS situation and clinical trials in Africa prior to Covid 19. I would also direct the reader to Judy Mikovits, Michael Yeadon, Robert Malone and Steve Kirsch, who have long and informative videos available from alternative sites.

Here is the Table of Contents

How to Find Lifesaving COVID-19 Treatment Guides and Doctors

Preface: The Pandemic Is the Opening Salvo

Introduction by Peter A. McCullough MD, MPH

Introduction by Vladimir "Zev" Zelenko MD

Introduction by Elizabeth Lee Vliet MD

PART ONE:

ANTHONY FAUCI AND THE MAKING OF COVID-19

Chapter 1 Fauci, Globalism, and China: Discoveries that Drove Us into Action

Chapter 2 Fauci Builds a Reckless Research Empire and Lies to the U.S. Senate

Chapter 3 Was SARS-CoV-2 "Made in China"?

Chapter 4 Did China Intentionally Unleash COVID-19 on the World?

Chapter 5 Fauci Deceives Presidents Obama and Trump About His Deadly Research

Chapter 6 Fauci's Grandiose Utopian Ambitions

Chapter 7 Fauci, Bill Gates, Forbes, the Koch Brothers—and Their Victims

PART TWO:

COVID-19 POLICIES AND THE END OF SCIENCE

Chapter 8 What Is Your Risk of Death if You Catch COVID-19?

Chapter 9 Killing Patients to Make Inexpensive Good Drugs Look Bad

Chapter 10 Fauci Cheats to Make Expensive Bad Drugs Look Good

Chapter 11 COVID-19 "Vaccines" - A Giant and Fatal Experimentation on Humanity

Chapter 12 Masks Are Not About Your Health

Chapter 13 Case Counts Rising and More People Dying

Chapter 14 Mass Murder in New York State

PART THREE:

COVID-19 AND THE PREDATORY GLOBALISTS

Chapter 15 Bill Gates' Master Plan Found: Implements Operation Warp Speed in 2015-2017

Chapter 16 Fauci Predicts the Pandemic's Onset with Certainty

Chapter 17 Clinical Trials—Gold Standard for Scientists or Golden Calf for Predatory Corporations?

Chapter 18 Big Pharma—A Giant Among Global Predators

Chapter 19 Top Medical Journals Sell their Souls

Chapter 20 Klaus Schwab—The Great Reset and the Silence of the Cities

Chapter 21 Joe Biden and John Kerry—Fighting "World War Zero" with the Great Reset

Chapter 22 Names and Shared Characteristics of America's Top Global Predators

Chapter 23 How Globalists Pervert Capitalism

Chapter 24 Shared Values—President Joe Biden, Bill Gates, and LeBron James

Chapter 25 Bloomberg Celebrates China's Rise and America's Demise

Chapter 26 The "New Normal" Becomes Forever Abnormal

Chapter 27 The Globalist War Against President Donald Trump and America First

Chapter 28 My Expertise and Background for Evaluating Dr. Fauci and COVID-19 Policies

Chapter 29 Bill of Particulars Against Dr. Anthony Fauci

PART FOUR: RECOVERING OUR LIBERTY

Chapter 30 Terrorizing Us to Tame Us

Chapter 31 Public Health Policies—Weapons to Destroy Freedom

Chapter 32 Suffering and Recovering from Loss of Freedom

Chapter 33 They Fear and Hate Us—But Who Are We, Really?

Chapter 34 The Escalating War Against America's Freedoms

Chapter 35 Takeaway Lessons from COVID-19 Totalitarianism

Chapter 36 Action Steps to Save Freedom

Chronology and Overview Acknowledgments About the Authors Endnotes
