

The Curse of Cash
Kenneth Rogoff

So I'm better off entrusting my money to Wells Fargo?

Hmmm. So I'm better off entrusting my money to Wells Fargo, where the interest THEY CHARGE ME on my deposit will fund \$125 million bonuses for fraudsters with get-out-of-jail-free cards? I don't think so.

Don't underestimate real criminals. They are adept at Bitcoin, gold smuggling, hawala transfers and much more. Rogoff's plan would do exactly as all the other commenters say - simply make honest people's assets visible to Hillary Clinton et al. How frightening!

As others have noted, this represents a total turnaround by Rogoff. I gave his previous book *This Time Is Different: Eight Centuries of Financial Folly* five stars.
